

Computer Assignment and Use Policy AFIT Cyber Defense Network (CDN)

1. The following sets out the standards for acceptable use of course material, tools, techniques, malicious code, and exploits discussed in classes conducted using the AFIT-CDN. By providing your signature, you agree to abide by the following rules and statements set forth by the AFIT Center for Cyberspace Research (CCR).
2. Material presented in class is for information and educational use only. Material presented does not necessarily represent the views or policies of the U.S. Air force
3. Any tools, techniques, malicious code, or exploits presented in class shall only be used within the conduct of approved courses in assigned classrooms.
4. Under no circumstances shall any of the class material, tools, techniques, malicious code, or exploits presented in class be shared with or provided to individuals or groups not enrolled in applicable AFIT CCR courses.
5. Under no circumstances shall any of the class material, tools, techniques, malicious code, or exploits presented in class be used on the Internet, AFIT network, AF network, any other network, or against their users.
6. The CCR labs and classrooms are *research* versus *open-access* labs and your assignment to a particular workstation is on an *as requested, as approved, case-by-case basis*. Use of the labs and classrooms is a *privilege* versus *right* and access is easily revoked if conditions in this computer assignment and use policy are not followed.
7. The CCR labs and classrooms are *controlled access rooms* with doors that shall remain closed and locked at all times.
8. Users are assigned a specific workstation location and computer equipment. Upon initial assignment, the computer will include a *basic system operating image* containing various software applications that are commonly used to support research and/or classwork. The following *MUST* be considered:
 - a. General rules for using government computing resources and software installation, management and control apply. Please ensure you understand these rules.
 - b. *No equipment shall be removed from the lab or classroom, or moved between desks within the lab/classroom, without prior approval/consent of CCR personnel.*
 - c. The computers and printers in the CCR labs and classrooms are connected to CCR's AFIT-CDN network. There is *no AFIT/SC computer support*.
 - d. If your computer becomes dysfunctional, *DO NOT CONTACT AFIT/SC FOR HELP*, as they do not maintain AFIT-CDN lab computers. *CCR responsibility for recovery is limited to hardware replacement and/or restoring the original configuration using the basic image.*
9. Important notes regarding the AFIT-CDN network:
 - a. The network is maintained by CCR and generally used for instruction in the areas of computer network defense, network attack, network exploitation, etc. Thus, operational stability and a reasonable expectation of privacy cannot be assured.
 - b. *Files are NOT automatically backed-up* and each user should plan/operate accordingly.
 - c. The network is protected at several levels using various firewalls. *Anti-virus software is NOT allowed on the lab computers.*
 - d. General Housekeeping ... Expect DV Walk-Through Visits on a Moment's Notice! Workstation areas shall remain clean with professional and personal items arranged in an orderly fashion. All trash will be removed from workstation areas on a daily basis.

Failure to comply with the above may result in removal from AFIT enrollment without graduation and/or course credit and punitive actions for violations of Article 92 and 103 of the UCMJ. Failure to comply with the above requirements may also lead to prosecution by civilian authorities, both state and federal.

The undersigned hereby acknowledges that he/she has read the AFIT-CDN Computer Assignment and Use Policy, will abide by conditions stated therein, and understands that access privileges may be revoked for violations.
